

Styling Approach

My approach: CSS Modules / plain CSS, because it is simple to manage, gives me direct control over the design, and is suitable for the size of this project.

Color Tokens

Token	Hex	Logo & Name
--color-primary	#BC1414	 D' Noms of Decilio
--color-secondary	#FFEDA2	
--color-bg	#FFFCF6	
--color-accent1	#A2A93E	
--color-accent2	#D6D2A5	

Type Scale

Style	Size	Weight	Used for
Heading		Bold	Section Titles
Body		Regular	Paragraphs, lists
Small		<i>Regular/italic</i>	Labels, footer

Spacing Rule

Base spacing unit: **8px**

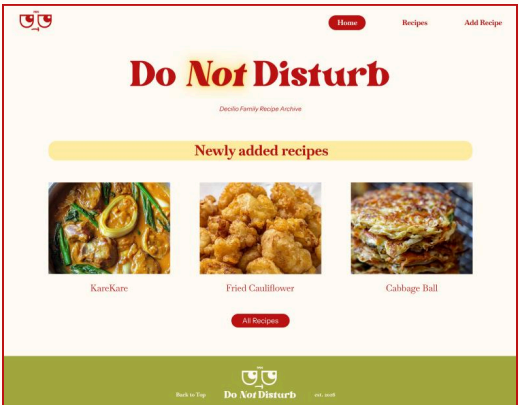

--space-1		8px
--space-2		16px
--space-3		24px
--space-4		32px

Reusable Components

Component	Level	Appears on	Props it takes
Button	Atom	All screens	variant, label, onClick
Input	Atom	Recipes, add & edit recipe	value, placeholder, onChange
Logo	Atom	All screens	size
Search Bar	Molecule	Recipes	value, onChange, placeholder
Recipe Card	Molecule	Home, recipes	recipe, onView
Form Field	Molecule	Add & edit recipe	label, type, value, onChange
Navigation	Organism	All screens	activePage
Recipe List	Organism	Recipes	recipes, onView
Recipe Form	Organism	Add & edit recipe	recipe, mode, onSave
Footer	Organism	All screens	---

Responsive Plan

Breakpoint	Screen Width	Design Changes
Mobile	< 768px	Navigation collapses, content stacks vertically, and recipe cards use a single-column layout.
Desktop	≥ 768px	Full navigation is displayed and recipe content has 3 columns.

Accessibility Check

- ✓ Use sufficient color contrast between text and backgrounds.
- ✓ Use clear labels for recipe form fields.
- ✓ Provide descriptive alternative text for recipe images.
- ✓ Keep text readable on both mobile and desktop.
- ✓ Use visible states for interactive elements such as buttons and links.
- ✓ Do not rely on color alone to communicate information.
- ✓ Keep navigation and interactive elements easy to identify.
